MATERIAL PROPERTIES

The pool bodies of these prefabricated swimming pools consist of seven layers of material, each of them have a special function.

Colourfast, Easy care, Skin-friendly

- 1. Duracolor 90 HD. The synthetic high-density colour carrier layer for highly stressed swimming pool surfaces
- 2. Fine cell layer to minimise fibre print on the high-gloss surface. Makes the pool noticeably smoother

Resistant to osmosis thanks to epoxy acrylate

- Robust carrier layer made of high-strength fibre mats
- Chemical-resistant fibreglass
- Fibreglass fine layer as base layer
- Ceramic coupling layer to create a homogeneous and durable structure. All layers are embedded in highly resistant epoxy acrylate

Insulation saves energy, saves your budget

- Insulation layer made of polyurethane rigid foam
- K-value 0.3 W / m² - k. (For comparison: triple insulating glass = 0.45 W / m² - k)

Stabilisation

- Backup material as 'last layer' and final layer
- Integrated steel rectangular tubes and a standing step
- Provide maximum stability

SIDE WALLS
6 layers (WITHOUT foam insulation)

FLOOR
7 layers

The material properties

The rigid foam insulation on the floor is made of an elaborate epoxy-acrylate laminate with 7 layers and a ceramic core as well as steel inserts. There are only 6 layers in the side walls (without foam insulation!). This construction makes a MATCHPOOL extremely dimensionally stable. All built-in parts in the backfill area are made of sturdy stainless steel.

INSTALLATION PARTS PACKAGE

MATCHPOOLS MINI installation parts package Revolution for on-site installation in the pool.

2x REVOLUTION Inlet nozzle

1x Surface skimmer B280

1x BEHNCKE POWER LED, 25 W, warmwhite

BEHNCKE REVOLUTION

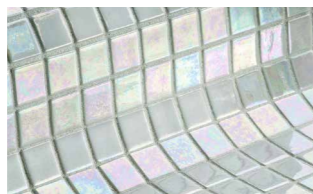

The new dimension of stainless steel components.

OPTIONAL ACCESSORIES

XANAS V4A jet system REVOLUTION 1,5 kW (Installation kit + jet system + self-priming pump)

The XANAS® REVOLUTION counter-current swimming system is suitable for all pool types. High-quality materials in the REVOLUTION design, tested safety, the best functionality and, last but not least, the 'Made in Germany' make the XANAS® REVOLUTION a sensible investment. More fun swimming, intensive use of your own pool, more joie de vivre and fitness - there are many arguments in favour of the XANAS® REVOLUTION.

Service shaft SMART

The compact and high-quality GRP technical shaft enables quick and easy installation of the most important technical components for any type of mini pool up to 30 m³ (outdoor pool) / 40 m³ (indoor pool). All components such as the stainless steel filter, pump, valve and measurement and control technology are supplied pre-assembled, enabling quick and easy final assembly with the pool installation parts.

- GRP shaft incl. cover and drain 117 x 80 x 65 cm
- Fully assembled
- Stainless steel Europa tank D450
- Manual 6-way valve 1 ½"
- Speck Smart 8 230 V pump (8 m³/h)
- Measurement and control technology for pH / redox measurement / dosing, as well as filter control

Year-round heat pump MR. SILENCE 30, 230 V

MR. SILENCE 30 is an innovative year-round heat pump with a number of outstanding advantages:

- 30% quieter than conventional heat pumps
- High energy efficiency: Significant energy savings thanks to InverPad® Turbo technology
- Durability: Robust construction and high-quality materials for a long service life & reliability
- Modern design
- Environmentally friendly

Technical box SMART 500

The SMART 500 technical box is equipped with a Cologne filter up to 600 mm in diameter (500 and 600 mm) for 10 or 14 m³/h respectively and comes with a 6-way backwash valve, a standard filter pump and measurement and control technology. Optionally, you can connect a solar control unit or a heat pump for optimum pool heating. The probe package 397 000 10 must be ordered in addition to the SMART 500 technical box.

- External dimensions: H 108 x W 205 x D 106 cm
- The technical box has a powder-coated aluminium frame, riveted as in aircraft construction, the sandwich panels are steel elements with PUR foaming
- Weight: approx. 350 kg
- Available in two colours: silver grey, anthracite
- Floor cleaner, storage trays and dosing containers are not included in the scope of delivery

novacomet FLAT CLEAR sliding hall

One of the most popular pool enclosures is the FLAT CLEAR model. Thanks to the basket arch cross-section, the model appear flat despite their width. novacomet offers you an aesthetic and modern cover for your pool. The element consists of four segments glazed with polycarbonate. On 4-part Comfort-Extra flat rail with permanent wind protection. The surface protection of the profiles is powder-coated anthracite (RAL 7016). The canopy is equipped with a side sliding door for access.

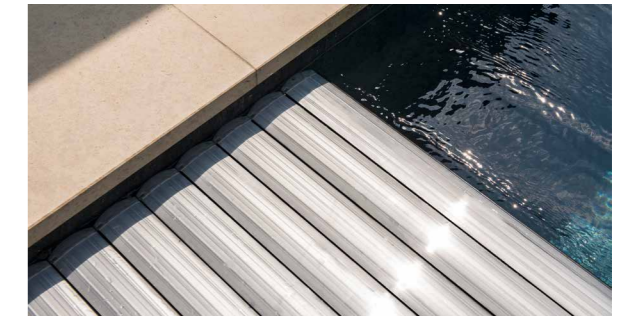

novacomet wood pool deck ATLAS

The outstanding feature of the ATLAS pool deck is its walk-on surface, which makes it possible to use the area above the pool when it is not in use. The structure is easily movable and can be effortlessly moved away from the pool, either fully or telescopically, depending on the type. In urban areas with increasingly smaller building plots, where the pool takes up a significant part of the garden area, the ATLAS pool deck is extremely advantageous. The wooden deck allows us to reclaim valuable space that would otherwise be taken up by the pool. It significantly improves the heat retention of the water and protects the water surface from falling dirt and precipitation. Most importantly, the walkable surface of the ATLAS pool deck protects against the dangers of open water.

ABDECKUNGEN

Rollo Solar - SOLAR DESIGN COVER PC in white aluminium

The system with its elegant Bauhaus-style cladding is ideal for efficiently minimising energy, chemical and water costs, even in more compact pools. The pool cover is not only a highlight in terms of design, but also in terms of functionality: it can be conveniently opened and closed by remote control and is driven by a robust tubular motor. Installation is simple - with just four screws, the cover can also be retrofitted effortlessly.

novacomet ROLL & GUARD safety cover

Optimum protection from falling into the pool. Children, pets and leaves can't get in - heat and water cannot get out. The safety cover complies with the strictest French standard, which was developed for testing swimming pools with regard to all general safety aspects.

- Modular design, allows easy replacement of the elements
- Suitable for all pool shapes
- Easy to install on any surface
- Simplified handling
- Aesthetic appearance, integrates perfectly into your garden and the environment
- Protects your children and pets
- Energy conservation: Less evaporation = less heat loss
- Cleaner water: Keeps out larger debris and leaves
- Takes up less space when rolled up, Suitable for all pool shapes
